

I just saw your appeal for Ideas on Planning I have a few suggestions

1 Planning decisions should be left to Local Authorities as the democratic decision makers for each place

Planning reporters should be abolished and the Scottish Government should be restricted to setting strategic goals and policy

2 Transport Links should be invested in to improve distribution and the economy with big distribution companies having rail heads and direct access to motorways

3 The long awaited Avon Gorge Bridge should be build to give a safer and faster link between the M8 and M9

4 Electric Charging for cars should be made widely available in all car parks and main roads in scotland

5 Power Storage centres should be established in all new homes and in every authority

regards

*Donald*
